Day 5 coding Statement: Write a program to identify if the number is even or odd

Description

Get a number as input from the user and check whether the given number is odd or even

Input

10

Output

Even

Input

5

Output

Odd

Code:

```
print("enter input")
ip =int(input())

if ip%2==0:
    print("The value is even")

else:
    print("The value is odd")
```

Output:

```
enter input
10
The value is even

enter input
5
The value is odd
```
